## Accessing Textbooks , McGraw-Hill ConnectED

Set the end date of your course. Follow the instructions to add students by selecting the “By Student Name” option. Type in a last name or the first letter of the last name and select appropriate students. Continue the process until you have selected all students in your classes. This will give the students you select access to the textbook from their account. Another option is to select *Create Redemption Code*. Give the code to your students to input once they have logged into their account. This code will give them access to the textbook via their account.

### **Student LOGIN convention:**

**Username:** First 3 letters of last name, first three letters of first name, last five digits of student ID number.

Example: PANPET12345 (Peter Pan)

**Password:** okaloosa1

**If a student is not listed,** it means the student was not part of the original August upload or your search is too refined. First try a less refined search using just the first letter of the last name. If you still do not find the student, provide Debbie Davis with student name, grade level, gender, and last 5 digits of the student number. She will upload the new student/s.
